Date: 22nd August 2016
Subject: **Ghana OCTP Development Project Offshore FPSO**

Dear Mr. Yap,

FMC Technologies would like to thank Y.H.H Marine Engineering Pte Ltd for the work they did in preparing and providing a new Crude Oil Custody Transfer Metering System that will be installed on the OCTP Ghana Development Project FPSO later this year.

All Y.H.H Marine Engineering Pte Ltd and affiliated contractors involved with this project were knowledgeable, professional, and courteous during the construction and testing phases of this project.

It should be noted this system makes FMC's first bi-directional prover ever manufactured in Singapore. This is a noteworthy achievement and FMC is very pleased with Y.H.H's attention to design and detail through manufacture.

YHH's continued support of FMC has proven invaluable with regards to creating customer success and on time delivery.

Thank you and Best Regards,
