

Ghana OCTP Development Project OCTP Offshore FPSO

18th August 2016

Letter of Appreciation

Reference: FMC Measurement Solutions Meter Skid Factory Acceptance Test

Thomas,

Yinson Production Pte Ltd / Eni SPA / Ghana Petroleum Commission would like to thank FMC Measurement Solutions for the work they did in preparing and providing a new Crude Oil Custody Transfer metering system that will be installed on the OCTP GHANA Development Project FPSO later this year.

All the FMC personnel involved with this project were knowledgeable, professional, and courteous during the design, construction and testing phases. Yinson is looking forward to the installation of the new system and FMC's continued support in the commissioning and startup of the system.

FMC's continued support of Yinson has proved to be invaluable with regard to Crude Oil Measurement and Custody Transfer. The metering systems provided by FMC Measurement Solutions have been the number one contributing factor to Yinson meeting all measurement standards during FAT. FMC's continued support over the years is very much appreciated.
